

## WHO WE ARE

### It's time to raise the bar on fleet management efficiency

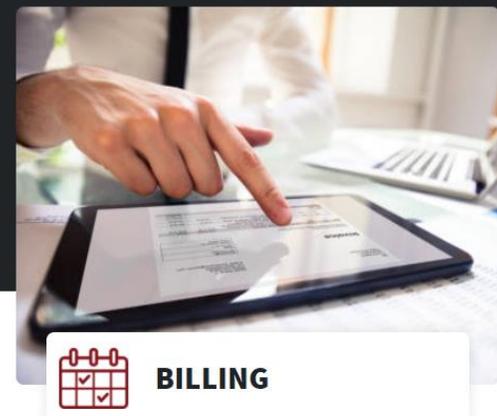

As the supply chain's reliance on technology grows and the gaps in the current offerings become clearer, CIT brings to market a proven, cost-effective platform designed to manage assets, streamline maintenance and repair and support unique business operations through highly configurable and scalable software previously only available through Consolidated Chassis Management (CCM), the largest neutral chassis pool manager in the United States.

With the CIT platform, customers can move away from legacy applications or solutions that fall short. Our CIT solutions resolve pain points such as:

- High out of service levels
- Rising fleet maintenance and repair costs
- Lack of proper visibility
- Excessive administrative costs
- Inefficient workflows
- Low driver production with high frustration levels

**By utilizing the right technology solution, it acts as a driver in realizing supply chain fluidity, and allows for increased focus on customer service and new opportunities.**

## FEATURED PRODUCTS

# SOLUTIONS

DEVELOPED BY FLEET OPTIMIZATION INNOVATION EXPERTS

## Equipment Tracking & Monitoring

Maximize asset productivity with visibility into equipment movement from gate in to gate out

## Reporting & Analysis

Transform your business by leveraging your data

## Toll Management

Improve toll payment processes, lower administrative expenses and eliminate costly late fees

## Job Order Management

Monitor and manage job orders to minimize downtimes and reduce unnecessary expense

## Billing

Reduce administrative time, increase accuracy and minimize billing disputes

## Damage Rebilling

Simple, straightforward process to ensure accuracy and facilitate swift reimbursement

## Auditing

Provides visibility into patterns that may be slowing down your business

## Parts Consignment

Manage and control your cash flow and inventory without tedious, manual processes

## Say goodbye to spreadsheets, workarounds and overtaxed operations teams

CIT's innovative products and solutions have a proven track record of improving efficiency by addressing key pain points, including fleet utilization, cargo turnaround times, billing and administrative issues and visibility.

As the costs to maintain and manage assets continue to rise, CIT offers a configurable, scalable yet cost-effective intermodal equipment platform designed for asset managers of all sizes to reach new levels of productivity.
